Forest Stewardship Council recognizes Annandale Millwork Allied Systems

WINCHESTER, Va. (April 19, 2012) – Annandale Millwork and Allied Systems received Forest Stewardship Council® (FSC) (R) Chain of Custody certification under the Scientific Certification Systems (SCS) Forest Conservation Program.

Forest Stewardship Council certification is a voluntary, market-based tool that supports responsible forest management worldwide. FSC forest products are verified from the forest of origin through the supply chain. The FSC label ensures that the forest products used are from responsibly harvested and verified sources.

“We are very proud and excited to have been awarded this certification,” said Gene L. Frogale, Annandale Millwork and Allied Systems co-president. “Our customers will benefit from this knowing we are a trusted resource in obtaining the supplies they need for their environmentally sustainable projects. Overall, we are helping to preserve the world that we live in and we are making a difference for future generations.”

With the new certification, they are now certified to sell FSC Mix and FSC 100% products. The certification, which is valid until 2017, covers the production and distribution of pre-hung interior and exterior doors, windows and trim and custom architectural millwork using the transfer system.

With the FSC Certification, Annandale Millwork and Allied Systems has proved it supports and will uphold the standards of the Forest Stewardship Council. These criteria set and uphold the standards for how forests can be managed to meet the social, economic, ecological, cultural and spiritual needs of present and future generations. Developed through a strong, multi-stakeholder process, they include managerial aspects as well as environmental and social requirements.

Scientific Certification Systems is the leader in environmental and sustainability certification. One of the first certification bodies accredited by the Forest Stewardship Council in 1996, SCS has since certified more than 30 million acres of well-managed forests and 3000 companies in the FSC supply chain worldwide. Annandale Millwork and Allied Systems’ trademark license code is FSC-C110071.

About Annandale Millwork and Allied Systems Corporation

Annandale Millwork Allied Systems, incorporated in 1952 and now based in Winchester, Va., is a family-owned and -operated business built on the principles of family and community and is led by a team of seasoned professionals.
